## 1. About Liberi Foundation

This policy plan for the period 2026–2030 outlines the vision, objectives, and areas of operation of Liberi Foundation (hereinafter: Liberi).

Liberi Foundation was established in 2016 by Wilma Kaptijn and has been structured as a family foundation since 2026. The name Liberi means child in Latin and is also used in the sense of freedom. This twofold meaning forms the core of Liberi's work.

Liberi is committed to improving the future prospects of vulnerable children, young people, and families, both within the Netherlands (domestic) and abroad (international). By providing support in the areas of education, well-being, basic necessities, and health, Liberi contributes to structural improvements in living conditions.

This policy plan is considered a dynamic document. Liberi values flexibility and the ability to respond to current and urgent social needs.

Abroad, Liberi is committed to realizing and supporting sustainable (public benefit) development projects, with a focus on education and healthcare. Activities include building and renovating schools and medical posts, strengthening teachers and medical staff through training and facilities, facilitating food programs and basic provisions, and actively involving local communities in the development, implementation, and safeguarding of projects.
